VEDANT K. CHAWLA

(614) 698-8664 | vkuchawla@gmail.com | U.S. Citizen

Product Manager with 5+ years owning high-volume, business-critical platforms from conception to launch across enterprise and customer-facing products, in environments where accuracy, trust, and reliability are non-negotiable. Owns strategy, roadmap, and execution end-to-end, partnering closely with Engineering, UX, and business teams to turn complex user needs into scalable products. Strong in data-driven decision making, experimentation, and applying Generative AI tooling to accelerate delivery, with a track record of launching products that serve tens of thousands of users and deliver measurable business impact.

PROFESSIONAL EXPERIENCE

Delta Air Lines, Atlanta, GA **June 2026 – Present**

Product Manager, Ticket Servicing & Valuation

- Own strategy, roadmap, and delivery for the platform that presents customers with real-time, side-by-side comparisons of refund and account-credit value for any purchase cancellation or change, powering $2B+ in annual calculations across web, mobile app, and all customer channels.
- Lead modernization of the valuation engine so customers instantly see accurate, trustworthy quotes, transitioning from real-time calculation to a pre-computed model that cuts latency, improves reliability, and prevents operational disruption.
- Partner across 6+ engineering and product teams (eligibility, fulfillment, pricing, order management) to manage dependencies, risks, and release planning, aligning delivery schedules and ensuring seamless launches.
- Drive pricing infrastructure strategy, migrating fee calculation from a third-party vendor to an internal engine to reduce external dependency and give the business direct, data-informed control over pricing logic.

Delta Air Lines, Atlanta, GA **June 2025 – June 2026**

Technical Product Manager, Crew IT

- Drove adoption of Pay 360, an AWS Cloud-based platform delivering accurate, transparent payroll experiences for 17K+ employees.
- Owned strategy and execution for visibility into 20+ complex payroll transaction types, achieving a 99% UAT pass rate and leading a controlled beta launch to 5,000+ users.
- Gathered direct feedback from senior stakeholders and 100+ end users through in-person demos, translating frontline input into roadmap decisions that drove adoption.
- Owned backlog prioritization and story definition, partnering with UX/UI design, architecture, engineering, and QA to introduce structured intake frameworks that improved clarity and accelerated 2-week sprint cycles.
- Applied Generative AI tooling (AWS Kiro, Claude, Microsoft Copilot) to author specifications, refine the product backlog, and ship a deployment tracker covering 50+ code changes across new functionality, features, and defects, ensuring full sprint visibility.

Southwest Airlines, Dallas, TX (Remote) **February 2023 – June 2025**

Product Owner, People & Finance

- Led implementation of a new Salesforce platform, shaping strategy and adoption for 80K+ employees and 3K+ non-profit partners.
- Drove multi-quarter roadmap, release planning, and cross-functional dependency management across engineering, QA, and risk teams.
- Developed business cases and secured $3M in transformation funding by quantifying ROI, operational efficiencies, and risk mitigation; partnered with Data Engineers to migrate 60+ legacy data tables into Salesforce.
- Delivered $150K in annual savings by sunsetting legacy platforms and optimizing release execution.

Abercrombie & Fitch Co., New Albany, OH (Remote) **June 2021 – December 2022**

Systems Engineer, Systems Engineering Operations

- Delivered automated solutions for 100+ VM migrations, supporting enterprise transformation initiatives.
- Collaborated with application and engineering teams to streamline WebLogic-to-OpenShift migrations for 50+ applications and resolved cross-platform issues across Windows, Linux, and OpenShift in 24/7 on-call rotations.

SKILLS & CERTIFICATIONS

Product: Product Strategy, Roadmapping, Product Launch, Backlog Prioritization, Experimentation, Business Case Development, Stakeholder Management, Cross-Functional Leadership (Engineering, UX, AI/ML)

Data & Technical Fluency: Applied Generative AI Tooling (AWS Kiro, Claude, Microsoft Copilot), SQL, Data Analysis, A/B Testing, HTML/CSS, Python

Cloud & Platforms: AWS, Microsoft Azure, Salesforce, OpenShift/Kubernetes (Foundational), Jira, Confluence

Certifications: Salesforce Administrator | Microsoft Azure Fundamentals | Databricks Generative AI | UC Berkeley Product Management Studio | Anthropic Academy (In Progress)

EDUCATION

Indiana University, Bloomington, IN – B.S. Informatics **August 2017 – May 2021**

Specialization in Business | Minor in Apparel Merchandising
